**Additional Spaces**

*Dressing Rooms*

The California is well equipped with dressing rooms. However, they are split between the basement and the second floor. As with load in, you should plan for your cast to take a little time to get on stage. This is probably a good time to emphasize that the backstage elevator is SLOW and your cast should not count on it in a rush situation. Besides, they need the exercise, right? Seriously, the elevator is rather high capacity, and that means very slow speed. Cast should plan on using the stairs if at all possible.
